Strategic Direction

Our Goals for 2002

- Conduct hearings and render decisions in a timely fashion.
- Communicate with clients on the appeal process, how to appeal and the role of the board.
- Accommodate legislative amendments by reviewing internal processes, policy and procedures to ensure that services are provided within appropriate time frame and in accordance with amendments.
- Manage financial resources appropriately while at the same time ensuring client needs are met.
- Review local authorities borrowing requests in a timely manner to accommodate provincial/federal grant applications.
- Investigate board's services to see if any information can be provided through the internet to improve efficiency and access.
- Investigate existing processes for working committees to establish consistency in procedures, which will ensure efficient and cost effective delivery of service.
- Develop and establish a code of conduct for board members.
- Research, recommend and implement training for staff in the areas of mediation and information technology.

Administration

Administration is responsible for staffing, information services, purchasing, financial administration, communication initiatives and policy development and implementation for the board and its committees.

Management is to ensure the integrity of financial data reported by the board. This responsibility is fulfilled through preparation and presentation of financial information and other data in accordance with guidelines developed by Department of Finance, with exceptions specifically noted.

The Financial Administration Manual and the Treasury Board Accounting and Reporting Manual provide for internal accounting controls, policies and procedures. Employees exercise their best judgment to ensure the accurate reporting of activities and use of financial resources. Existing internal controls provide reasonable assurance assets are safeguarded and financial records are reliable for use in preparing financial information and maintaining accountability of assets.

Financial Overview

In 2000-01, Saskatchewan Municipal Board's budget of \$987,934 was divided into three general areas: Administration/Local Government Committee; Planning Appeals; and Assessment Appeals. Funding was distributed according to the figures shown in Figure No. 1 which indicates the actual for 2000-2001 and budget estimates for 2001-2002.

Revenue is derived from filing fees for appeals, which are received from the general public, municipalities, and other agencies. A fee is also charged for authorizing and preparing debentures for local authorities. Figure No. 2 shows a breakdown of revenues received for the 2000-2001 fiscal year, which are deposited in the province's General Revenue Fund.

Asset Management and Protection

Personnel: Includes Board members, out-of-scope staff as well as in-scope support staff. Emphasis was placed on educating and training personnel to increase productivity and effectiveness.

Electronic Hardware, Software and Data: Includes local area network with 13 desktop computers connected to the network. Data includes word processing files, spreadsheet applications, revenue and expenditure system, a database to track appeal status for assessment appeals and remote access to government accounting and human resources systems and internet access. Policy was developed to ensure the security of government electronics system for the protection of our external and internal infrastructure and information.

Major Activities

- **Approve Long-Term Borrowing including Debenture Issues**

The purpose in approving this borrowing is to ensure financial stability of local authorities and compliance with various statutes. Investors and the public are provided with assurance that procedures and approvals comply with statutes and related policy.

Includes approving various forms of debt, preparing related bylaws and debentures.

- **Approve Local Improvements**

The purpose in approving local improvements is to allow municipalities to undertake works or services that specially benefit particular lands. A portion or all of the cost of the benefiting work is charged (assessed) against the benefited land.

Works and services which can be charged as local improvements are defined in *The Local Improvements Act, 1993*.

- **Approve investment of surplus funds, creation, use of reserve funds and sinking funds.**

The purpose in approving these financial transactions is to ensure municipal funds are securely invested and other funds are used appropriately.

Committee objectives include preservation of capital and interest income maximization.

- **Approve Sewer and Water Rates**

Ensure utility bylaws comply with *The Urban Municipality Act, 1984* and committee procedure. Ensure rates are equitable for all users and encourage sufficient rates to provide revenue for current utility operation, expense, debt repayment and future capital expenditure.

- **Provide Advisory Assistance**

Provide local authorities with timely advice respecting all aspects of committee work.

- **Manage Union Hospital Debt**

The Health Districts Act enables the Saskatchewan Municipal Board to bill and collect debenture debt from participating municipalities for union hospitals which no longer exist. The funds are forwarded to the appropriate financial institution. Applicable bank accounts are reconciled annually.

In 2001, 21 municipalities were invoiced for an amount of \$198,783.73. Debenture debt of three union hospitals was retired in 2001.

Goals

To ensure financial stability for municipalities and security for their investors.

The following figures illustrate ongoing approvals and authorizations of the Local Government Committee for 2001.
